

What's Actually Working in Your Ads

Full read of the live account (act 2207080182887207) — every ad, ranked by the metric that pays your bills: **cost per Instagram conversation started**. Below is the exact recipe your winners share, element by element, so you can rebuild it on demand.

\$319,536

TOTAL SPENT

85.7M

IMPRESSIONS

1.73M

PEOPLE REACHED

\$0.98

BEST COST / CONVO

MESSAGES

OBJECTIVE

The one-line answer: your single best-converting creative in the entire account is a **static image** — the "ÇFARË TË PISH..." question-hook layout (dark-green headline on cream, a hand pouring the shot into a glass, a 4-point green checklist, and a **POROSIT TANI** button). It brings conversations at **\$0.98 each**, beating almost every video. Rebuild that template with a new hook + product and you have a repeatable winner.

1 • The scoreboard

Your account optimises for **Messaging conversations started** (the DM that leads to a sale). So the winner isn't the prettiest ad — it's the one that starts a chat cheapest, at volume. Top ads by spend (Meta only pours budget into what converts), flagged image vs. video:

AD	TYPE	SPENT	CONVOS	COST / CONVO	CTR
1-3 (Çfarë të pish / mëngjes)	IMAGE	\$4,633	4,727	\$0.98	1.79%

AD	TYPE	SPENT	CONVOS	COST / CONVO	CTR
31-5-1	VIDEO	\$5,450	4,900	\$1.11	2.15%
4-3 (Çfarë të pish / darkë — Reds)	IMAGE	\$1,461	1,195	\$1.22	2.34%
22-5	VIDEO	\$4,720	3,143	\$1.50	1.77%
8-3 (Ozempik Natyral — G1)	IMAGE	\$1,886	1,057	\$1.78	1.36%
28-4 (you on camera)	VIDEO	\$3,750	2,093	\$1.79	1.11%
21-5 (14-shot box flat-lay)	IMAGE	\$6,032	2,672	\$2.26	0.94%
24-11 (highest spend)	VIDEO	\$10,712	4,151	\$2.58	0.84%
UL BARKUN DETOX (avocado character)	IMAGE	\$4,333	1,737	\$2.49	1.11%

Account CTR averages 1.05% and CPM \$3.73 (cheap, healthy). "Convos" = Messaging conversations started (7-day). The avocado "character" ad was duplicated 8+ times and, across copies, drifts to \$3.10–\$4.49 per convo — your weakest scaled format.

WHAT THE WINNERS HAVE IN COMMON

- **Question hook** that names the outcome ("what to drink to flatten your belly").
- **Product shown in action** — mid-pour into a glass, not a flat product shot.
- **A 4-point benefit checklist** — scannable proof in half a second.
- **Cream background + dark-green text** — premium, high-contrast, thumb-stopping.
- **One clear CTA:** POROSIT TANI → opens a DM.

THE HONEST READ

- **Video wins on raw volume** (you on camera = trust) but your best **static** beats most videos on cost. Run both — they feed different buyers.
- **Curiosity + specific number** ("deri në 3 kg", "14 ditë") out-pulls vague benefit claims.
- **Cartoon/character ads look fun but convert worst.** Use them for cheap reach, not for the money.
- **High CTR ≠ cheap convo.** 4-3 has your best CTR (2.34%); the box ad (21-5) gets clicks but a pricier chat — the on-image checklist pre-qualifies better.

2 · Your #1 static template, dissected

This is the "1-3" ad — \$0.98 per conversation, the cheapest in the account. Every element earns its place. Copy this skeleton for any product.

Layout map (not the real file). Zones are what matter.

ZONE BY ZONE

① **Top-left, biggest text — the hook.** Dark pine-green (#1B3F2F), heavy uppercase sans (Montserrat/Anton weight). A question. Takes the top third. This is 80% of the job.

② **Sub-hook in red (#B74949).** One line, states the payoff — "so you flatten your belly". Colour contrast makes the promise pop.

③ **Mid-left — 4 benefit pills.** White rounded chips, green ✓, 2–3 words each. Stack vertically. Never more than 4.

④ **Right side — product in motion.** A hand tilting the shot bottle, liquid mid-pour into a glass with a little splash. Movement = appetite + realism. Label facing camera, unretouched.

⑤ **Bottom-centre — CTA button.** Solid pine-green pill, white bold "POROSIT TANI". Looks tappable.

Background. Warm cream, subtly split into two tones (light left / taupe right panel) so text and product each sit on their own field.

3 · Every detail that's working

Visuals — ranked by what they earn

- ① **Pour-shot editorial (best).** Hand pouring the shot/sachet into a glass on a cream studio background. Used by 1-3 and 4-3 — your two cheapest static convos. Realistic, premium, "this is a real product".
- ② **Ozempik / arrows (strong angle).** The G1 sachet centred with 4 hand-drawn arrows pointing to benefits, headline "Ozempik Natyral Në Një Bustinë?". Borrows a massive search trend — \$1.78/convo. Reuse the "natural [famous thing]" angle.

- ③ **Bundle flat-lay (offer ads)**. The open kraft box of 14 shots with fresh lemon / ginger / celery. Great for "package deal" pushes; converts at \$2.26 — solid but pricier than the pour-shot.
- ④ **Character / cartoon (weakest)**. The walking avocado. Eye-catching, cheap reach, but \$2.49–\$4.49/convo. Demote it.

Headlines & hooks — the exact winning lines

All winners follow one of three formulas. Keep them uppercase, on the image, outcome-first:

FORMULA A — THE "WHAT TO DRINK" QUESTION (YOUR CHAMPION)

ÇFARË TË PISH NË MËNGJES? → QË TË ULËSH BARKUN
ÇFARË TË PISH NË DARKË QË TË HUMBËSH DERI NË 3 KG?

FORMULA B — OUTCOME + TIMEFRAME

UL BARKUN PËR 7 DITË · ME 14 SHOTSA
UL BARKUN PËR 2 JAVË ME PAKETËN DETOX

FORMULA C — TREND-JACK / CURIOSITY

OZEMPIK NATYRAL NË NJË BUSTINË?

Rules that hold across winners: ask a question or name a number; always put the **belly / weight / bloat** outcome in the hook; keep it to ≤ 7 words per line; never bury the benefit.

Colours — your winning palette (exact hex)

 Pine Moss #1B3F2F headlines	 Cream / Alabaster #ECEFE8 background	 Goji Red #B74949 sub-hook accent	 Broccoli #8EB85F check-marks	 Turmeric #D58D3C arrows / detox liquid
 Aloe Dew #71B5A2 secondary				

⚠ **IMPORTANT CONTRADICTION TO FIX IN YOUR BRIEF**

Your saved rule says "white text only, never black." But the data says the opposite for these ads: your best-converting statics use **dark-green / near-black text on cream**. Keep the white-text rule **only for dark or photographic backgrounds**. On a cream/beige background, dark-green text is what's winning — don't force white text and kill the contrast.

Text placement — the map that repeats

Hook → top third, left-aligned

Sub-hook → directly under, red

Checklist → middle-left, stacked

Product → right side, mid-pour

CTA button → bottom centre

Logo/handle → small corner

Left column = words, right column = product. That split is in every top static. It gives the eye a "read left, believe right" path and keeps text off the product.

The CTA & caption engine

On-image button is always **POROSIT TANI**; the Meta CTA is **Send Message** (INSTAGRAM_MESSAGE) — every winner opens a DM, never a website. Your captions (primary text) that pull best share a shape:

CHAMPION CAPTION (1-3) — COPY THE STRUCTURE

Nëse do bark më të sheshtë para verës, duhet të fillosh tani.

Paketa 14-ditore është krijuar për: • Reduktim të fryrjes • Kontroll të oreksit • Ndjesi më të lehtë në bark
• Mbështetje për humbje peshe

Nuk është magji. Është rutinë e përditshme.

1 shot çdo mëngjes. 14 ditë fokus. Rezultate që i sheh në pasqyrë.

Porosit tani...

Note "Nuk është magji" = your brand line "Jo magji. Biologji." The day-by-day caption ("Dita 1: iken fryrja ... Dita 14: deri në 6kg") is the other proven shape — it sells the journey.

4 • Ready-to-paste asset — build the next winner

Drop this into Nano Banana / Ideogram / GPT-Image. Swap the **[PRODUCT]**, **[HOOK]**, **[SUB]** and the 4 benefits. Upload your real bottle photo as reference so the label isn't invented.

Studio commercial ad, 1:1 square, 1080×1080. Warm cream background subtly split into two tones — lighter left panel, soft taupe right panel, clean seam.

RIGHT SIDE: a realistic hand tilting a [PRODUCT] bottle, pouring the [LIQUID COLOUR] liquid mid-air into a clear glass below, small dynamic splash, label facing camera dead-on, front-lit, razor sharp. Match the uploaded product exactly – do NOT restyle the label, cap, size or shape.

TOP-LEFT: dominant bold uppercase sans-serif Albanian headline in deep pine-green (#1B3F2F), stacked 2 lines: "[HOOK]". Directly under it, one line in Goji red (#B74949), bold uppercase: "[SUB]".

MIDDLE-LEFT: four white rounded pill chips stacked vertically, each with a green (#8EB85F) check-mark on the left, short Albanian benefit inside: "[BENEFIT 1]" / "[BENEFIT 2]" / "[BENEFIT 3]" / "[BENEFIT 4]".

BOTTOM-CENTRE: solid pine-green rounded button with white bold uppercase text "POROSIT TANI".

Style: hyperrealistic editorial product photography, soft even studio light, ultra clean, high contrast, mobile-thumbnailed readable, aggressive direct-response aesthetic. Text rendering razor sharp.
Negative: no extra props, no gradients, no text glow, no drop shadows on text, no emojis, no watermark, no second bottle.

Tip: Albanian "ë/ç" render cleanly in Nano Banana / Ideogram; Midjourney mangles them — if you must use MJ, generate the visual clean and set the Albanian text in Canva.

5 • Do / Don't checklist

✓ DO

- Lead with a **question hook naming the belly/weight outcome** + a specific number.
- Show the product **being poured**, not sitting still.
- Keep exactly **4 benefit checks**, cream background, dark-green headline, red sub-hook.
- One button: **POROSIT TANI → Send Message**.
- Run the same hook as **both static and a you-on-camera video** — they compound.
- Refresh the winning template with a **new hook every 1–2 weeks** before fatigue (your top ads run at 4–6 frequency).

✗ DON'T

- Don't scale **character/cartoon** ads — cheap attention, expensive chats.
- Don't force **white text on cream** — it kills the contrast that's winning.
- Don't add a 5th text block (price badge, testimonial) — clutter drops CTR.

- Don't send to a website — **keep the conversation in DMs.**
- Don't rely on CTR alone — judge by **cost per conversation.**
